

Palniki gazowe

Characteristics

1. Powered by natural gas or liquefied gas
2. Single-stage burner (on / off)
3. Gas/air mixer in the combustion tube
4. Possibility of obtaining optimal combustion conditions thanks to air regulation and the head
5. No need to remove the entire flange for maintenance, the burner can be easily disassembled.
6. Manual flow adjustment
7. One flange and one insulating pad for connection to the exchanger
8. Air inlet manually adjustable with a deflector
9. Single-phase motor powering the pump and blower
10. Flame detector - ionization electrode
11. Degree of protection IP 40
12. Quiet air intake
13. Plastic housing
